DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Michael Huppert (Registration # 40,268) on 07/02/2008 at 1:00 pm EST.

The application has been amended as follows:

In the Claims:

Cancel Claim 25.

Amend Claim 16 as follows:

16. (Currently Amended) A spray gun for atomizing and spraying paint, the spray gun comprising:

a spray gun body having a coupling hole;

a pressure indication unit detachably connected to the spray gun body, ~~so as to form most of at least part of a spray gun grip,~~ said pressure indication unit defining an air inlet, an air outlet, and a fluid channel extending between the air inlet and the air outlet, wherein the air outlet is coupled to the coupling hole of the spray gun body, and

Art Unit: 3752

wherein the pressure indication unit forms most of a spray gun grip and is detachable from the spray gun body as a one piece unit; and

a pressure transducer assembled in the pressure indication unit, the pressure transducer including a pressure sensor communicated with the fluid channel via an air passage formed in the pressure indication unit, a digital converter for converting a pressure detected by the pressure sensor into an electrical signal, and a digital indicator for providing a digital indication of an output electrical signal from the digital converter,

wherein, a portion of the grip is integrally formed with the spray gun body and serves as a mounting bracket for the pressure indication unit.

Amend Claim 17 as follows:

17. (Currently Amended) The spray gun according to Claim [[1]] 16, wherein:
the digital converter comprises a circuit board, and the pressure sensor comprises a pressure sensitive element that is exposed to the fluid channel via the air passage;

the pressure sensor, the circuit board and the pressure indicator are integrally connected so as to form a pressure indication module;

the pressure indication module includes power terminals connected to the circuit board; and

the pressure indication module is formed by molding an insulative resin such that only the power terminals and the pressure sensitive element are exposed outside of the pressure indication module.

Amend Claim 26 as follows:

26. (Currently Amended) The spray gun according to Claim 16, wherein a ~~portion of the grip depends from the spray gun body and~~ the pressure indication unit is mechanically fastened ~~thereto~~ to the portion of the grip that is formed with the spray gun body.

REASON'S FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: For at least the following reasons, the prior art of record fails to teach where a spray gun has a pressure indicting unit that is has internal electrically sealed terminal wires that provide power to the pressure indication unit that has an air inlet and an air outlet that are coupled together by a fluid channel where a user can selectively detach the pressure indication unit in a manner that the pressure indication unit serves as a majority of the spray grip of the spray gun. The prior art of record also fails to teach where the spray gun grip is composed of two pieces: one being integrally formed with the spray gun and has a mounting bracket with a screw fastening means to secure the pressure indication unit to the spray gun which also serves as the second or majority portion of the spray gun grip. The prior art of record additionally fails to teach where the detachable pressure indication unit that serves as a majority of a spray grip handle has a pressure transducer formed within and functions to measure a pressure from a sensor and

converts the sensed pressure into an electrical signal for output onto a liquid crystal display by way of a digital converter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Examiner's Comment

Examiner acknowledges the cancellation of Claims 18, 19, 22 and 23.
